INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP03/00014

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:

because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

There is no unifying novel inventive concepts common among claim 1, claim 2, claim 3, claims 6 and 7, and claim 9. The constitutions of film properties and treatment methods described in these groups of claims are not matters which, at the time of the filing of this application, were considered by persons skilled in the art to be closely relevant. Consequently, there is no relationship among those groups of inventions which involves a common special technical feature in the meaning of Rule 13.2 of the Regulations under the PCT. It cannot hence be said that they are a group of inventions so linked as to form a single general inventive concept.

Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.☐ No protest accompanied the payment of additional search fees.
